

IN THE CLAIMS:

- Sub  
E1
1. (Currently Amended): A method for information handling within a document created using a first application program comprising the steps of:
- entering a first information in the first application program;
  - ~~automatically~~ marking without user intervention the first information to alert the user that the first information can be utilized in a second application program; and
- responding to a user selection by inserting a second information into the document, the second information associated with the first information from a second application program.
2. (Previously Presented): The method of claim 1, wherein the user selection further comprises an activation a device selected from a group consisting of a touch screen, a keyboard button, a screen button, an icon, a menu, a voice command device or other standard user interface device.
3. (Original): The method of claim 1, wherein the step of inserting the second information into the document further comprises the steps of:
- initializing the second application program;
  - searching, using the second application program, for the second information associated with the first information; and
  - retrieving the second information.
4. (Original) The method of claim 3, wherein when the second application program includes second information associated with the first information, performing the further step of displaying the second information.

5. (Original): The method of claim 4, further comprising the step of:  
completing at least one of the first and second information in the document.
6. (Original): The method of claim 1, wherein the first information comprises a name.
7. (Original): A computer readable medium, including program instructions, for performing the method of claim 1.
8. (Previously Presented): Electromagnetic signals propagating over a computer network, the electromagnetic signals carrying information for practicing the method of claim 1.
9. (Previously Presented): A computer readable medium, including program instructions, for performing the method of claim 2.
10. (Previously Presented): A computer readable medium, including program instructions, for performing the method of claim 3.
11. (Previously Presented): A computer readable medium, including program instructions, for performing the method of claim 4.
12. (Previously Presented): A computer readable medium, including program instructions, for performing the method of claim 5.
13. (Previously Presented): A computer readable medium, including program instructions, for performing the method of claim 6.
14. (Currently Amended): A method for information handling within a document created by a first application program comprising the steps of:  
entering a first information in the first application program;

~~automatically marking without user intervention the first information to alert the user that the first information can be utilized in a second application program; and responding to a user selection by performing an operation related to a second information, the second information associated with the first information from the second application program.~~

DT  
91  
15. (Previously Presented): The method of claim 14, wherein the first information is a name, and the operation performed is selected from a group consisting of an electronic mail, a telex, a facsimile or a letter addressed to the name indicated by the first information.

16. (Previously Presented): The method of claim 14, wherein the operation performed is entering additional data into a database.

17. (Previously Presented): The method of claim 16, wherein the additional data is entered by a user.

18. (Previously Presented): The method of claim 16, wherein the additional data is located within the document.
